AIRIMAGE SENSOR

• Controlling the indoor air quality

• World wide air quality map

ADVANTAGES

Application

- Improved filter operational lifetime
- Control production quality ٠
- ٠ API to the managem

BMS (Building nent system)	•	Energy savings through smart operations.Monitoring measured values in public spaces.
C	Connectivity to all Camfil air cleaners	
	Power supply: 5V DC	les um: PM 1 and PM2.5

	Operating range particles µm: PM 1 and PM2.5 Operating range RH: 0 - 100 not condensating Operating range temp : -10 to +50 (Accuracy +/- 3)
Comment	By connecting to an air cleaner you can lower the energy consumption - by raising and lowering the operating level of your Air Cleaners, depending on the number of particles in the air. The system saves energy and provides better protection of machines and people's health.
